25.5   CODING FOR ACTIVITIES

All ABAWDs must be offered an opportunity to retain eligibility for **SNAP** benefits. At each face-to-face or telephone contact with an ABAWD individual, the **SNAP** E&T Worker must offer the individual an activity if the individual is currently not participating. Procedures have been developed to track the offer of a placement and the actual acceptance of a placement. These must be noted in the case.

At the time an ABAWD actually beings the activity, the appropriate component code must be entered in RAPIDS to reflect the status. The start date and an anticipated end date must be entered.
