Subject: Training Opportunities for Supporting Children and Families Impacted by Substance Use Disorder Through IMPACT WV

To:

WV Birth to Three is pleased to share information on wonderful training resources through IMPACT WV.

IMPACT WV offers information, training and resources to families who are experiencing substance use disorders and the professionals who support them. The IMPACT WV program's goal is to improve the health and well-being of children diagnosed with NAS, women who were, or are, using substances, and their families who receive services from home visiting programs.

The IMPACT WV website provides a variety of ways that allow families and professionals to get connected. Families can find resources, get connected to providers, read blogs and learn strategies for improved health, parenting and resiliency. Professionals can access resources including community services, tip sheets or checklists, and obtain professional development through online learning modules.

On-Line Courses are approved for WV STARS, Nursing and Social Work CEU's. Topics include:

Child Development

Stigma

Adverse Early Childhood Experiences

Social Services

Substance Use

Adult Education and Employment

SBIRT

Addressing Challenging Behavior

To access the IMPACT WV training portal and resources, copy and paste this URL into your internet browser:

<https://wvimpact.org>

As IMPACT WV continues to survey service providers and families to assess areas of needs, the learning portal content and course will be updated regularly. We hop you explore and share this new resource!
