

BridgeValley Community & Technical College

# ASL Interpreter

Associate in Applied Science in American Sign Language Interpreting

The American Sign Language Interpreting AAS at BridgeValley Community and Technical College provides rich opportunities to learn American Sign Language from native ASL signers and certified interpreters. Students will develop proficiency in ASL and Interpreting during the program which includes formal classroom instruction, small group practice, and practical experiences. American Sign Language interpreters are responsible for conveying information, as well as the meaning and intention between signed and spoken English with an emphasis on cultural and regional dialects. Training in this program prepares students to take the state certification exam, which will qualify students to work as interpreters in educational, medical, legal, and governmental venues.
