

Family Guided Routines Based Intervention (FGRBI) - Coaching Families to Engage Their Children in Everyday Activities and Routines

FGRBI is an approach for providing early intervention services within a child and family's natural environment. With roots in activity based intervention, FGRBI focuses on parent-implemented interventions for children aged birth to three. FGRBI practices shift the role of practitioners to coaching families to embed intervention into their daily interactions with their child.

This is a self-paced course that will begin on the 1st of each month. Once enrolled you are expected to complete all content within 30 calendar days.

BEGINS JANUARY 1, 2023
