

## ***It's Exciting! New Forms are Coming!***

Several different Statewide Implementation Teams have been working during the past year to find ways that our early intervention system can be even more family centered and relationship based!

The Implementation Teams reviewed IDEA and research on evidence based practices to come up with new forms and processes that support relationship based early intervention.

We are still in the process of finalizing video overviews and other training materials for the new forms, but we want to post the forms ahead of time to give everyone an opportunity to view and become familiar with them.

Below are the dates when the forms will go into use statewide. We will also be discussing the forms during additional webinars and during our Come Grow with Us Regional meetings in October/November.

**Family Assessment** – *Interim Service Coordinators will use this new form for all new referrals starting **November 1, 2017***

**Assessment Template** – *All practitioners will use this new assessment template to complete evaluation/assessment reports for new WV Birth to Three referrals and all other WV Birth to Three assessments starting **November 1, 2017***

**Individualized Family Service Plan** – *All teams will use the revised form for Initial IFSPs of children referred November 1 and later, and for all Annual IFSPs **effective November 15, 2017***
