<p>Thursday, May 14, 2020</p>	<p>Neonatal Abstinence Syndrome – How Substance Exposure Impacts Development and Learning</p> <p>In this presentation we will review substance exposure in utero, it's impacts on early development as well as challenges experienced as these children grow older and transition into school. We will review current research and trends in care and additional ideas on how to facilitate family advocacy and engagement. We will review the importance of early developmental milestones and bonding with a caregiver during the early years and how we can help families facilitate relationships through home visitation programs. We will also review the different sensory systems and give strategy ideas for common challenges observed in both the home and school settings.</p> <p><i>Presenter: Cindy Chamberlin, To the Moon and Back</i></p>
