Learn about the epidemiology, clinical presentation, treatment and long-term outcomes of infants with neonatal abstinence syndrome (NAS) in

the U.S. Opportunities for prevention and early intervention will be discussed.

Learning Objectives:

1. Discuss CDC's role in protecting mothers and babies in the context of the opioid epidemic.
2. Review the clinical presentation and treatment options for infants with NAS.
3. Discuss possible long-term outcomes of NAS.
4. Outline opportunities for prevention or early intervention in children and families at risk for NAS.
