

Prior Authorization Criteria
Zofran in Pregnancy
for Quantities Exceeding Limits

1. Quantities of Zofran tablets beyond established limits (14 tablets per 30 days) will be approved for use in pregnancy if the patient has not responded to conventional therapy (promethazine).
2. Prior authorizations for quantities above established limits will be issued for up to a maximum of 90 days.
3. Authorizations will be given for an initial dose of 4 mg. TID with allowable increases with documented failures.

Adopted 5/17/2006
