

HIV Risk Factors

You need to think about now and your past.

1. I have used needles to take drugs, steroids, or other things not prescribed by my doctor.
2. I had a blood transfusion before 1987.
3. I have had a transplant such as organ, tissue, or bone marrow.
4. I have had a graft such as bone or skin from someone other than myself.
5. I have come into contact with someone else's blood.
6. I have had an accidental needle-stick.
7. I have had sexual contact with someone who has HIV/AIDS or has had a positive test for HIV/AIDS virus.
8. I have had sexual contact with a prostitute or someone else who takes money or drugs for payment for sex.
9. I have had sexual contact with someone who has used needles to take drugs, or steroids, or other things not prescribed by a doctor.
10. For women: I have had sexual contact with a man who has had sexual contact with another male.
11. For men: I have had sexual contact with another man.
