Jackson County Health Department
Contingency Plan

Purpose

The Jackson County Health Department depends on computer-supported information processing. This will continue to grow with the trend toward information technology within our organization.

The organizations dependency on computers for operational support poses the risk that a lengthy loss (excess of 72 hours) of these capabilities could seriously affect the overall performance of the health department.

The Jackson County Health Department recognizes the low probability of severe damage to data processing or support services capabilities of the organization. Nevertheless, because of the potential impact to the health department, a plan for reducing the risk of damage from a disaster however unlikely is vital. The health department’s plan is designed to reduce the risk to an acceptable level by ensuring the restoration of computers within twelve hours and all essential production within seven days of the outage.

The contingency plan identifies the response function within seven days of Jackson County Health Department and the resources to support them. The plan provides for ensuring that needed personnel and resources are available for both disaster preparation and response and that the proper steps will be carried out to permit the timely restoration of services.

This plan identifies and specifies the responsibilities of the Team, whose mission is to establish procedures to ensure the continuity of the health department’s business functions. In the event of a disaster affecting any of the functional areas, the Team will serve as a liaison between the functional area(s) affected and other departments within the agency as well as state supported program entities.

Maintenance/Testing

Ensuring that the contingency plan reflects ongoing changes to resources is crucial. This task includes updating the plan and revising this document to reflect these updates. Testing the updated plan and training personnel on changes are essential. The team is responsible for this comprehensive maintenance task.

Semi-annually or as needed, the Team will ensure that the plan undergoes a review and inform employees of changes since the previous review. Annually, the Team will initiate a complete test of the plan. Any revisions will be distributed to all authorized personnel, who will replace their old plans for the newly revised plans.
In the event of a disaster, the team provides general support and will work with employees focusing on resources and task integral to running the specific functional areas of the agency. This section provides general information about the organizations recovery efforts, the role of the Team and the responsibilities of each team member. The following is a list of each position on the Team, and a brief overview of each member’s responsibilities.

**Administrator:** Receive, evaluate and determines if there is an event/disaster. If necessary, activates Team. Manages and directs the recovery effort of the team. This person is responsible for reporting the status of the recovery operation to the Board of Health and Health Officer. If need be this person will be at the designated hot site.

**Information Security Officer:** Coordinates all data processing systems recovery. Also responsible for ongoing maintenance, training and testing of the Business Contingency Plan. Reports to the Administrator.

**Risk Communicator:** This person is responsible for the communication with the news media, public and staff as needed. Reports to the Administrator.

**Financial/Audit/Insurance:** Provide liaison for support of critical business functions affected by the disaster and insurance carriers, claim adjusters and provides recommendations or changes to the normal financial procedures. This person is responsible for supporting services to aid to recovery. Reports to the Administrator.

**Safety/Equipment:** Responsible for the assessment of damage and to identify what resources remain, salvaging equipment, supplies, and data. This person is also responsible for the list of office equipment that is needed for the restoration of the day to day operation of the health department. Reports to the Administrator.
