

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 1 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

1.0 PURPOSE

This policy defines and protects the integrity of the Department of Health and Human Resources (DHHR) network(s).

2.0 SCOPE

This policy applies to all DHHR employees accessing DHHR supported applications and computer systems. It also applies to personnel from other departments, agencies, contractors, and vendors using DHHR's data communications system(s) or networks which may be composed of any combination of Local Area Networks (LANs), or Wide Area Networks (WANs).

3.0 APPLICABLE DOCUMENTS/MATERIAL

Several DHHR regulations and state and federal laws affect the security of information processing resources, computer systems, computer software, and data files. They include the following:

- 3.1 [DHHR IT Policy 0501](#) – Use of IT Resources
Section 4.0 and Appendices A and B
- 3.2 [DHHR IT Policy 0502](#) – Virus Prevention, Detection, and Removal
- 3.3 [DHHR IT Policy 0513](#) – Physical Security for IT Resources
- 3.4 [DHHR IT Policy 0514](#) – Disaster Recovery
- 3.5 [DHHR IT Policy 0518](#) – Access Authorization and Modification
- 3.6 Office of Management Information Services (OMIS) Operating Procedure (OP)-01
Computer Room Security/Access
- 3.7 All DHHR Employee and Vendor Confidentiality Statements
- 3.8 WV Code - [§9-7-1](#), Confidentiality of Records
- 3.9 WV Computer Crime and Abuse Act - [§61-3C-4 through 61-3C-21](#)
- 3.10 WV Governor's Office of Technology (GOT) Directive
[State of WV IT Information Security Policy](#)
- 3.11 DHHR Common Chapters Manual

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 2 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

[Chapter 200](#) – Confidentiality
[Sections 1100-1150](#) – Computer Crimes

3.9 [DHHR Policy Memorandum 2104](#) – Progressive Discipline

3.10 [DHHR Policy Memorandum 2108](#) – Employee Conduct

3.11 [Federal Computer Fraud and Abuse Act of 1996](#)
Us Code, Title 18, Chapter 47, Section 1030

3.12 [Electronic Communications Privacy Act of 2000](#)
U.S. Code, Title 18, Chapter 119, Section 2511

4.0 RESPONSIBILITIES

4.1 Information Technology (IT) Asset Protection

4.1.1 The Chief Technology Officer (CTO) is responsible for the management, operation, and security of the DHHR network.

4.1.2 The CTO will ensure that IT assets are protected.

4.2 IT Network Security Management

4.2.1 A management committee will provide leadership on IT Network security matters in the DHHR.

4.2.2 The Information Security Officer (ISO) will coordinate IT security matters in the DHHR.

4.2.3 Periodic reviews will be conducted to verify compliance to the DHHR's network design, set-up, and configurations; as well as IT security policies and procedures.

4.2.4 Documentation of the IT security controls and procedures in the DHHR must be maintained.

4.3 User Security

4.3.1 All employees are required to comply with all applicable IT security policies and procedures.

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 3 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

- 4.3.2 IT security responsibilities must be defined for relevant employees as part of their job scope.
- 4.3.3 An on-going awareness program must be established to educate and train all employees on DHHR IT security requirements.
- 4.3.4 All software and computing devices used to store, process, and access information related to the DHHR's functions and services must be identified and assessed for legitimacy.
- 4.3.5 Software applications must be updated promptly when security necessitated patches become available.
- 4.3.6 All employees must be educated on procedures regarding security.
- 4.3.7 Employees must be accountable for their computers and for any actions that can be identified to have originated from them.
 - 4.3.7.1 PC's must always be locked or logged-off when left unattended.
 - 4.3.7.2 Passwords must never be shared under any circumstances.
- 4.3.8 All programmable computing devices must contain virus protection software.
- 4.3.9 All network connections from computing devices must be uniquely identified and verified.
- 4.3.10 Computing devices will be subject to all DHHR security controls when connecting to the DHHR's internal network via remote access.
- 4.4 Vendor/Contractor Management
 - 4.4.1 Vendors/contractors will be subject to the same rules and regulations outlined in this policy.
 - 4.4.2 A risk assessment must be conducted to determine the security risks associated with giving a vendor and/or contractor access to a DHHR resource.
 - 4.4.3 Security requirements for vendors/contractors must be defined by DHHR and accepted by the vendor/contractor.
- 4.5 Resource Management

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 4 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

4.5.1 An owner must be defined for each IT resource.

4.5.2 The role-based access requirements of employees utilizing the IT resource must be defined.

4.5.3 All access to computing resources will be granted on a need-to-use basis.

4.5.4 Critical system software and files must be routinely backed-up.

4.6 Incident Management

4.6.1 Incident response plans supporting the DHHR's security objectives must be established.

4.6.2 Procedures, guidelines, and mechanisms that must be utilized during a security incident will be reviewed as needed.

4.6.3 Roles and responsibilities of the incident management teams must be established and clearly defined.

4.7 Authentication

4.7.1 All employees must be authenticated before they are given access to a resource intended for a restricted group.

4.7.2 Appropriate controls must be established and maintained to protect the confidentiality of passwords used for authentication.

4.8 Access Control

4.8.1 Access to the DHHR's assets will be granted on a need-to-use basis.

4.8.2 Access to assets must be approved by the resource owner or a designee.

4.8.3 All access to any DHHR asset must be immediately disabled when access is no longer required.

4.9 Encryption Control

4.9.1 Confidential or sensitive data (i.e., credit card numbers, calling card numbers, log-on passwords, etc.) must be encrypted before being transmitted through the Internet.

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 5 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

4.9.2 All sensitive information requiring encryption protection must use an OMIS-approved cryptography system.

4.10 Database Security

4.10.1 Controls must be established and maintained in the management and administration of the databases. Appropriate authorization must be obtained for access and modification of databases.

4.11 Network Security

4.11.1 Access to network resources must be controlled and limited to authorized employees only.

4.11.2 The CTO or a designee will approve all network connections. The Network and Technical Support (NTS) group and/or the Data Center Desktop Support (DCDS) group will implement the appropriate access control mechanisms.

4.11.3 Networks spanning across the DHHR's boundaries will have defined multiple points, each protected by the appropriate security perimeter and access control mechanisms.

4.11.4 Applications accessible by the public must be placed in the demilitarized zone (DMZ).

4.11.5 The network access firewall and/or secure gateway must be configured to deny all incoming services unless explicitly permitted.

4.12 Network Monitoring and Compliance

4.12.1 NTS will monitor, oversee, and take actions to safeguard DHHR network traffic and network-based systems.

4.13 Security Operations

4.13.1 Only security tools authorized by the CTO or a designee must be used to enforce the IT security policies and procedures.

4.13.2 Security tools and any information derived from their use must be restricted and will be released as authorized by the CTO or a designee.

4.14 Availability, Recovery, and Business Continuity

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 6 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

4.14.1 Each Bureau/Office must work with OMIS to define the level of availability required to meet their business needs and service standards.

4.14.2 The DHHR must develop business continuity and recovery plans.

4.14.3 Employees involved in the business continuity and recovery plans must be aware of their roles and responsibilities during a disaster or a service disruption.

4.14.4 The business continuity and recovery plans must be tested periodically.

4.14.5 The DHHR must have documentation of its backup strategy.

4.14.6 Backups of critical business data and resources must be stored in an off-site physically secured environment.

4.15 Enforcement Authority

4.15.1 The ISO is the person designated by the CTO to monitor and provide initial enforcement of DHHR's information security program and IT policies.

4.15.2 The Information Security Liaisons (ISL) are employees assigned by the Bureau Commissioners and/or Office Directors to assist the ISO in the protection of information resources.

4.15.3 The OIG (Office of the Inspector General) is the authority who investigates reported instances of departmental employee misconduct.

4.16 Violations and Disciplinary Action(s)

4.16.1 All suspected violations of this policy will be reported to a supervisor in the chain of command above the employee.

4.16.2 The supervisor or designee will review the facts and, if it is suspected that a violation may have occurred, the matter will be referred to the Office Director, Bureau Commissioner, or Community Services Manager (CSM) for appropriate action.

4.16.3 As determined by the Office Director or the Bureau Commissioner, instances of abuse or misconduct, depending on the circumstances, will be referred to either the ISO or the OIG for further investigation.

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 7 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

4.16.4 Employees who willfully or knowingly violate or otherwise abuse the provisions of this policy may be subject to (1) disciplinary action as outlined in DHHR Policy Memorandum 2104; or (2) criminal prosecution.

5.0 DEFINITIONS

- 5.1 Access Control – rules for limiting access to safeguard systems and data at all times and under all conditions.
- 5.2 Chief Technology Officer (CTO) – The director of OMIS and the person responsible for all information resources within the DHHR.
- 5.3 Data Center Desktop Support (DCDS) – The OMIS organization that is responsible for the DHHR Data Center and the Kanawha County offices.
- 5.4 Demilitarized Zone (DMZ) – A network added between a protected network and an external network in order to provide an additional layer of security. (Sometimes called a perimeter network.)
- 5.5 Employee – Individuals employed on a temporary or permanent basis by the DHHR; as well as contractors, contractors' employees, volunteers, and individuals who are determined by the Bureau or Office to be subject to this policy. For the purposes of this policy, this also refers to anyone using a computer connected to the DHHR network.
- 5.6 Encryption – The process of enciphering or encoding data so that it is inaccessible to unauthorized users.
- 5.7 Incident or Intrusion – An adverse event associated with an information system that: (1) fails to comply with security regulations or directives; (2) results in attempted or actual loss of data; (3) involves the waste, fraud, abuse, loss, or damage of property or information; and (4) reveals and/or exploits hardware or software vulnerabilities.
- 5.8 IT Assets – Any of the data, hardware, software, network, documentation, and personnel used to manage and process information.
- 5.9 Local Area Networks (LAN) – A communications network made up of servers, workstations, a network operating system, and a communications link that serves employees within a confined geographical area.
- 5.10 Malicious Code – Computer instructions, usually in the form of a program, designed to perform undesired changes to the computer system, data, or programs. (Ex: computer virus)

DOCUMENT: Policy	DOCUMENT NUMBER: IT-0511	REVISION: 01/02/04	PAGE 8 OF 8
SUBJECT: IT Network Security		EFFECTIVE DATE: 02/24/03	

- 5.11 Network – A system of computers, and often peripherals, such as printers, linked together. DHHR workstations are connected to a Wide Area Network (WAN), which is a larger network, which uses telephone lines or radio waves to link computers that can be up to thousands of miles apart.
- 5.12 Network Monitoring – Detection of break-ins or break-in attempts by reviewing logs or other information available on a network. Intrusion detection is essential for maintaining network security.
- 5.13 Network Monitoring Tools – Automated software tools that perform real-time analysis of data traffic, and employ advanced logic to detect patterns of activity that indicate that an intrusion attack is underway.
- 5.14 Network Security – Measures taken to protect a communications pathway from unauthorized access to, and accidental or willful interference of, regular operations.
- 5.15 Network Security Database – This will be established and maintained by the CIO. The purpose of the database is to maintain up-to-date contact information that will identify the emergency contact during a computer or network security incident, and for the dissemination of guidelines and procedures for network security.
- 5.16 Network and Technical Support (NTS) – The OMIS organization responsible for engineering and emerging technologies, Help Desk/Customer Support, and field support.
- 5.17 Office of Management Information Services (OMIS) – This office reports directly to the DHHR Deputy Secretary for Administration and provides the leadership, innovation, and services needed to achieve efficient and effective technology solutions to meet the goals of the DHHR.
- 5.18 Resource/Data Owner – The person having primary responsibility for the creation and maintenance of the data content.
- 5.19 Risk Assessment – An evaluation of the following: (1) the exposure of an asset to the identified threats; (2) the potential impacts of an event; (3) an estimate of the likelihood of an event occurring; and (4) the effectiveness of existing or proposed safeguards to protect an asset.
- 5.20 Wide Area Network (WAN) – A communications network connecting computing devices over geographically distant locations. A WAN covers a much larger area than a LAN, such as a city, state, or country. WANs can either use phone lines or dedicated communication lines.
